

SERVICE CAPABILITY STATEMENT

Construction services

Plant maintenance, inspections & repairs

CONSTRUCTION

Our services

Port City Heavy Diesel Maintenance provides specialised mechanical maintenance, repairs and field service support across the construction industry.

From major infrastructure developments to commercial and industrial projects, our skilled technicians understand the importance of keeping equipment operational, minimising downtime and maintaining project schedules.

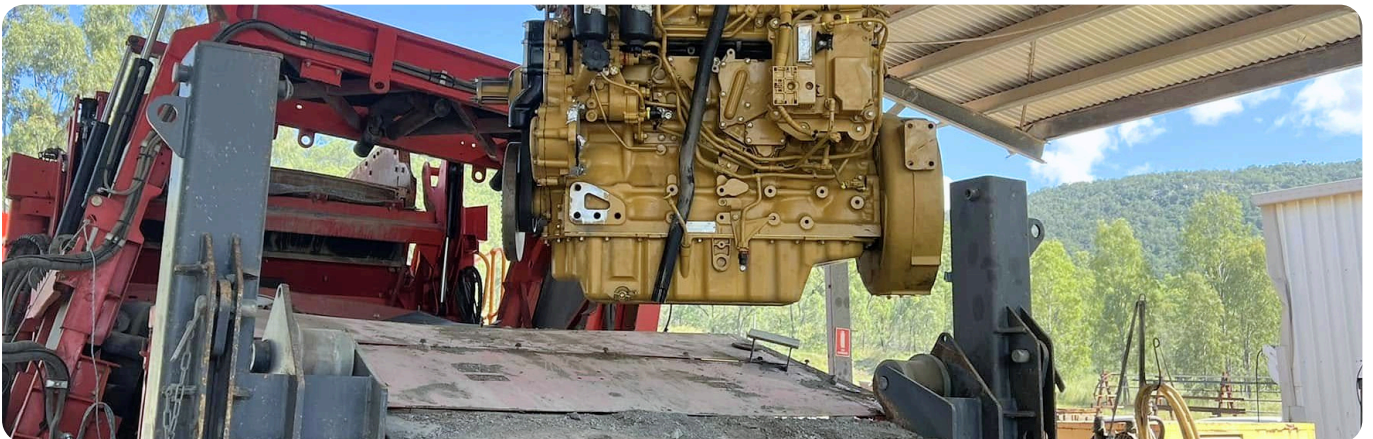

Our experience covers a broad range of construction and material-handling equipment.

Our capabilities

- Preventative maintenance and scheduled servicing.
- Hydraulic, mechanical and electrical fault diagnosis.
- Breakdown response and on-site repairs.
- Major component replacements and rebuilds.
- Telehandler 90-day and annual inspections.
- Fleet maintenance and ongoing contractor support.

How we support you

Whether supporting a single machine or an entire construction fleet, PCHDM delivers the technical expertise, reliability and workmanship required to keep projects moving safely and efficiently.

Engine work under cover.

SCOPE OF WORK

Equipment we support

Reliable equipment support for demanding construction projects.

01 Telehandlers

Servicing, repairs, hydraulic systems, boom functions and scheduled inspections.

02 Material handling equipment

Forklifts, rough-terrain forklifts and lifting equipment.

03 Earthmoving equipment

Excavators, dozers, wheel loaders, skid steers and backhoes.

04 Access equipment

Elevated work platforms, boom lifts and scissor lifts.

05 Site support equipment

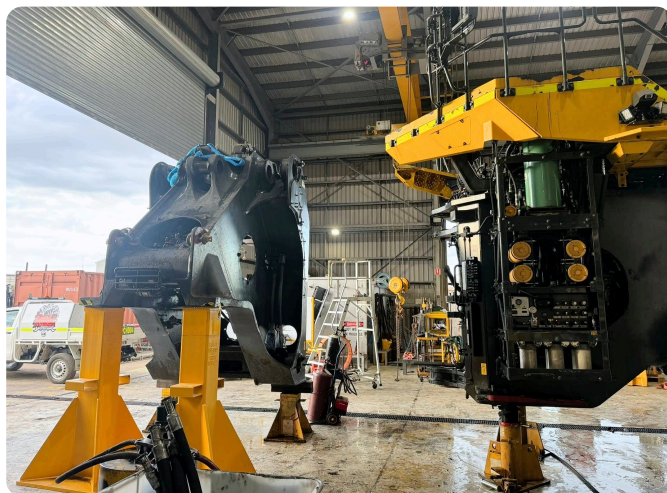

Generators, compressors, lighting towers and water pumps.

06 Heavy construction equipment

Articulated dump trucks, rollers, graders and water carts.

Engine work under cover.

Workshop component and machine work.

SELECTED WORK

Our projects

Labour hire and fault-finding experience from the wider business, relevant to contractors managing plant and workforce demand.

LABOUR HIRE · CONTRACT SUPPORT

More capacity under the customer's banner

The task

A customer needed additional fitters and service vehicles to scale up for a major contract.

Our part

Port City supplied fitters in the customer's uniforms and rebranded field service vehicles to work as part of their team.

Port City and Komatsu service vehicles. Fleet photograph; the labour hire customer is not identified.

What changed

The customer could expand its delivery capacity with Port City's people and vehicles supporting the contract.

Skid steer no start fault

A persistent fault that had been difficult to pin down. Found and fixed by a Port City apprentice backed by senior technicians within a couple of hours, saving a crane lift and freight to Townsville.

READY FOR YOUR SUPPLIER REVIEW
